

*ShutterKits*TM

Kit Set Shutter Manufacturers

1st September 2018

Hi Peter,

I would like to thank you for the assembly videos you made for us. For some time we have thought that our shutter assembly instructions were well below par and thought that perhaps an IKEA type of instructions would have worked but these videos way surpass even those type of instructions and look very professional.

The whole process was very easy and your attention to detail was appreciated. We have had a positive response from everyone that has seen them so far and everyone thinks they are well done and quite clever. We look forward to see how they work for us from a sales point of view as well.

I wish you well in all your future endeavours and if you need a reference I will gladly take the call.

Cheers.

Regards,

David.
